

Predicting the Price for Airbnb Listings

Presented by Nicholas Reise

Roadmap

1. What is Airbnb
2. Problem/Solution
3. Data
4. Model Description
5. Findings
6. Risks/Limitations
7. Next Steps

What is Airbnb?

Total Guests

200,000,000+

Castles

1,400+

Cities

65,000+

Countries

191+

Airbnb

Goals

Data

Model

Findings

Limits

Next Steps

Problem

Airbnb does not offer substantial guidelines for hosts listings their homes.

"The price you charge for your listing is completely up to you. . ."

- Airbnb

Problem

Inaccurate listing can cause:

1. Inefficient allocation of marketing budget
2. Mislead guests, causing host to incur fines
3. Underbooked listings due to over pricing

Solution

Create a model that calculates the listing price for a given Airbnb

Customer Lifetime Value

Allocate their marketing budget more efficiently

Calculate prices for online marketing

Solution

Provides clear guidelines to hosts and guests

Prevent penalties incurred by hosts

Encourage prospective hosts to join Airbnb

Reassure guests that the listing price is fair

USA

Los Angeles

is cinematic cityscapes

Airbnb → Goals → **Data** → Model → Findings → Limits → Next Steps

Top sights in Los Angeles

1

Huntington Library, Art Collections & Botanical Gardens

PASADENA & THE SAN GABRIEL VALLEY

2

Broad

DOWNTOWN LOS ANGELES & BOYLE HEIGHTS

3

Getty Center

BEVERLY HILLS, BEL AIR, BRENTWOOD & WESTWOOD

4

Griffith Observatory

LOS FELIZ & GRIFFITH PARK

5

Los Angeles County Museum of Art

WEST HOLLYWOOD & MID-CITY

6

City Hall

DOWNTOWN LOS ANGELES & BOYLE HEIGHTS

7

Museum of Tolerance

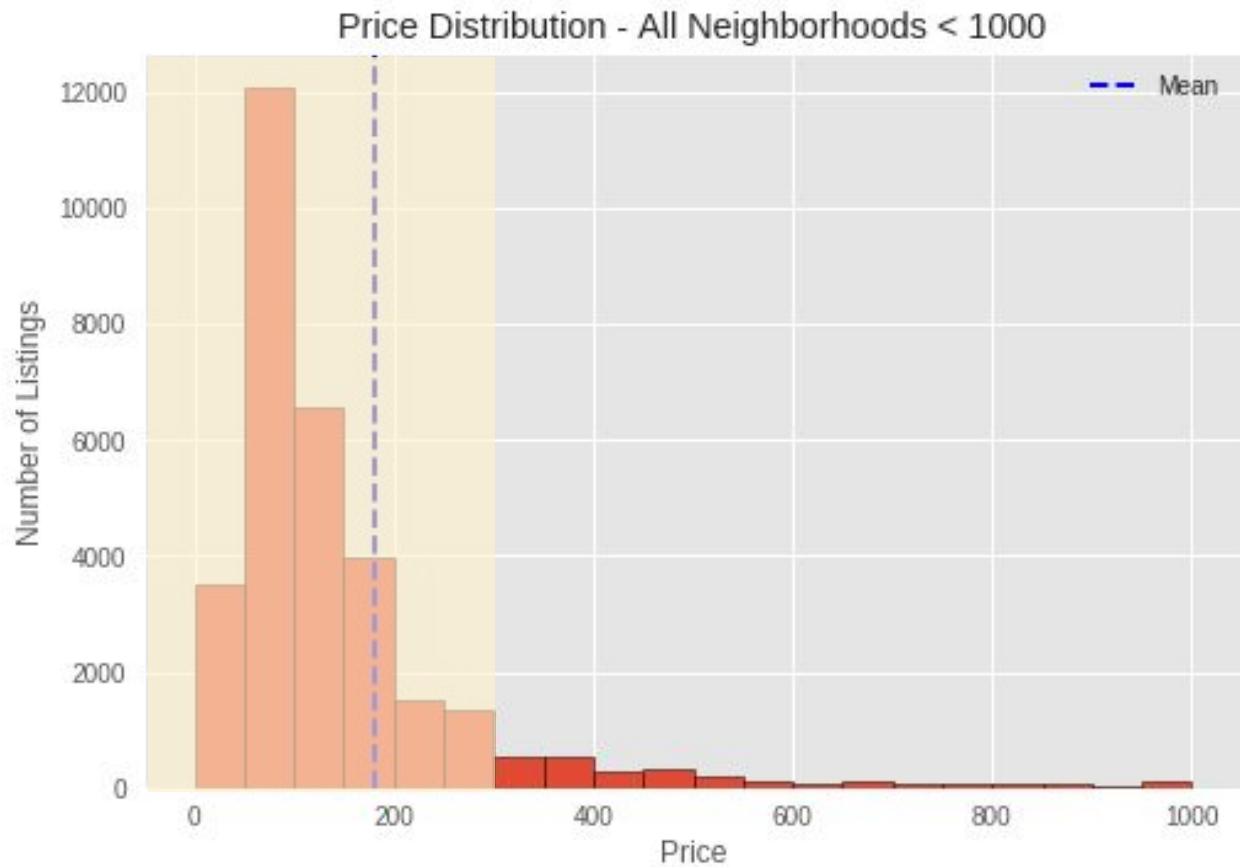

BEVERLY HILLS, BEL AIR, BRENTWOOD & WESTWOOD

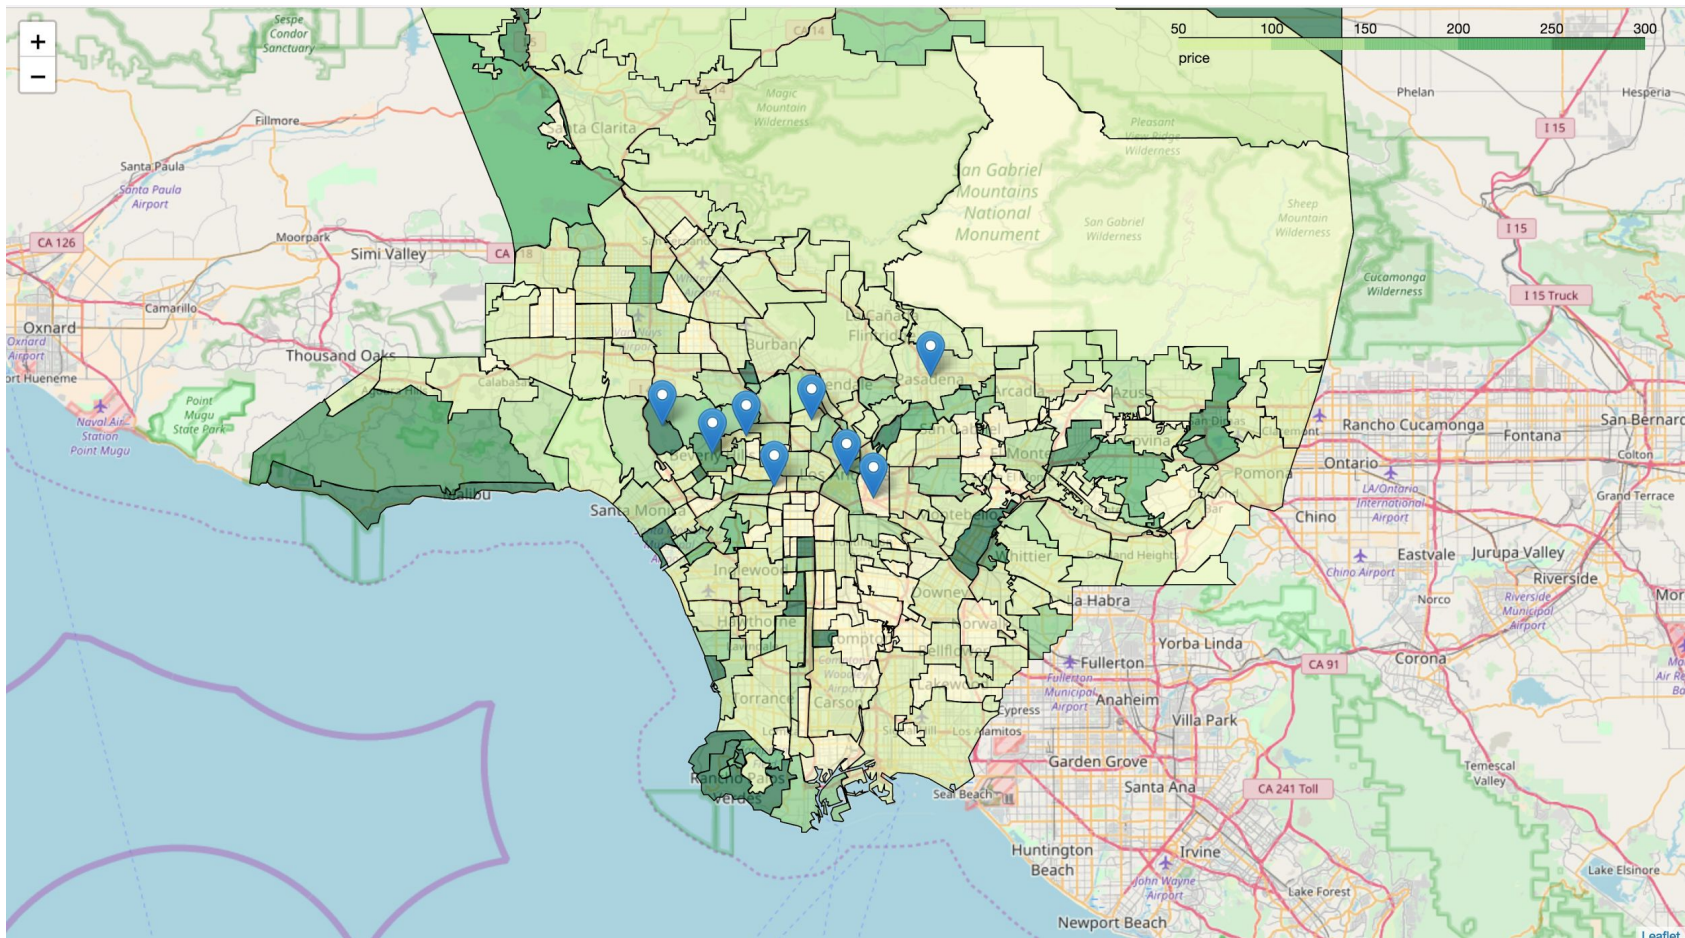

8

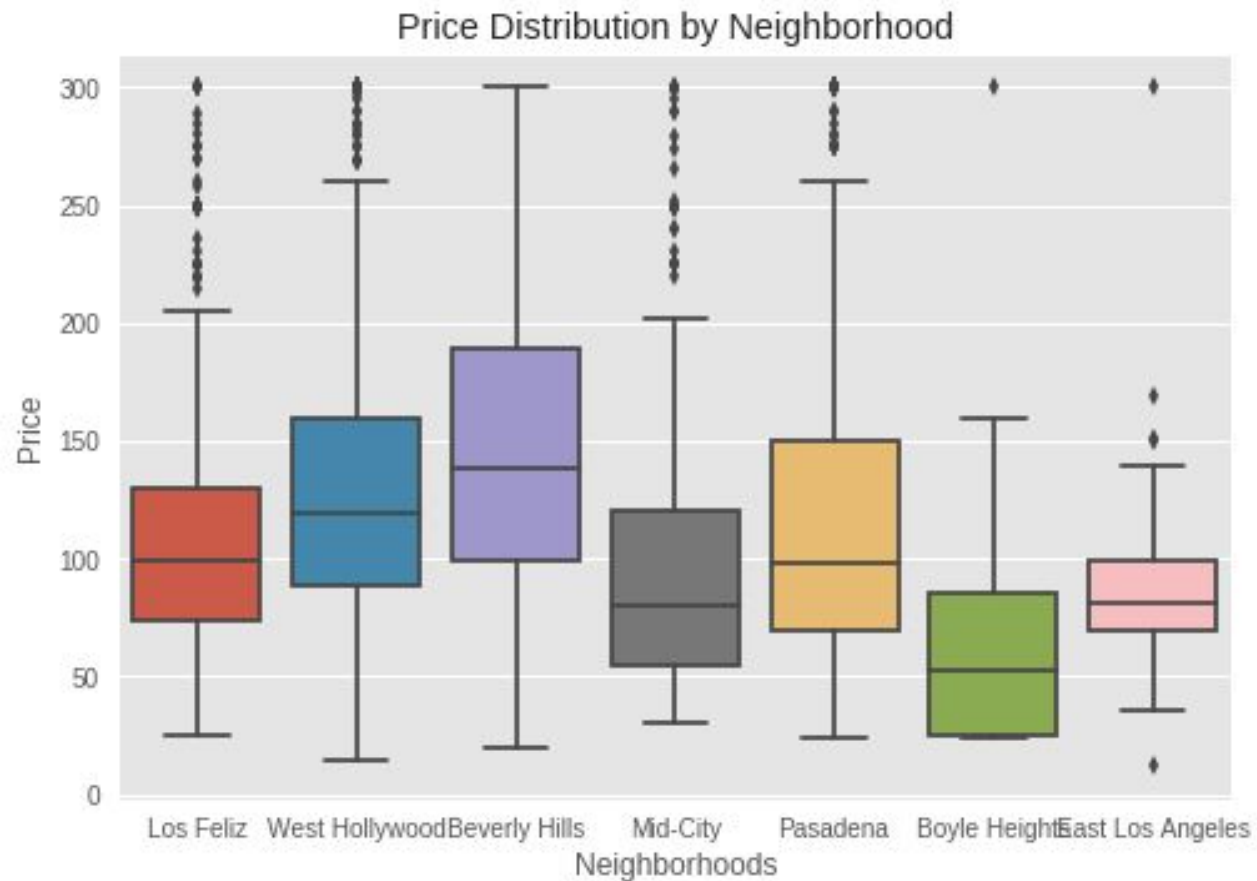

Petersen Automotive Museum

WEST HOLLYWOOD & MID-CITY

Airbnb → Goals → **Data** → Model → Findings → Limits → Next Steps

Findings

Risks/Limitations

1. Model is limited to neighborhoods
2. 60% of the variability in price is explained by the model
3. Future iterations will requires additional features

Next Steps

1. Incorporate more data
 - a. National and International
 - b. Archived data
2. Neighborhoods and marketing
3. Build a web application

Questions?
